LISHA CHEN

Kenmore, WA | 202-436-6428 | morninglisha@gmail.com | lisagh.github.io

PROFESSIONAL SUMMARY

Software engineer with 7+ years of experience in frontend architecture and product design, building accessible product experiences, reusable UI components, and interactive prototypes.

TECHNICAL SKILLS

Engineering: React, React Native, TypeScript, JavaScript, HTML, CSS/SCSS, Performance Optimization, Frontend Architecture, Percy, Playwright

Design & UX: Design Systems, Design Tokens, Shared UI Libraries, High-Fidelity Prototyping, WCAG Accessibility, Figma, Interaction Design, Data Visualization

EXPERIENCE

Warner Bros. Discovery (HBO Max)

Software Engineer II, Frontend — 11/2021 – Present

- Owned technical design and implementation of key feature frameworks within three team-led HBO Max rebuilds, applying shared components and design tokens for responsive, accessible UI.
- Built the Paris Olympics schedule framework and evolved it into a reusable feature supporting 1,700+ annual NBA, NHL, and MLB live events.
- Resolved three blocking screen-reader and keyboard-navigation defects in Apple Pay checkout and browsing, documenting platform-specific workarounds for future maintenance.
- Established First Contentful Paint measurement across three web surfaces, correcting duplicate route reporting; evaluated visual regressions with Percy and Playwright.
- Mentored new engineers and conducted technical interviews for engineering interns.

eBay

Software Engineer, Full-Stack — 09/2019 – 06/2021

- Led frontend architecture and full-stack delivery of a React campaign management platform from 0 to 1 as a founding developer in an eBay Marketing Tech division.
- Owned API-to-UI data flows for campaign analytics dashboards, defining contracts with backend engineers and implementing middleware transformations; partnered with UX designers on operations workflows.
- Built reusable UI modules adopted across marketing engineering teams.

John Deere

UX Designer & Prototyper — 12/2018 – 07/2019

- Translated combine harvester hardware states and constraints into clear touchscreen workflows and user interactions.
- Improved engineering handoff efficiency by 50% through interactive UI documentation and clearer design specifications.

SELECTED PROJECTS

Zhenfy.ai | Design Lead & Engineer

- Drove end-to-end design and development of a no-code AI app-building platform, including brand identity and prompt-driven layout generation.
- Built interactive prototypes for role-adaptive workflows and error recovery, and created brand and loading animations with reduced-motion support.

PawPath | Engineering Lead

- Directed frontend implementation for PawPath, partnering with designers on accessible post-adoption care workflows for shelters and adopters.

EDUCATION

M.S., Human-Computer Interaction | Indiana University, School of Informatics, Indianapolis, IN — 2016–2018

B.B.A., E-Commerce | Xiamen University, Tan Kah Kee College, China — 2011–2015

AWARDS

Red Dot Award Winner | Brands & Communication Design | PawPath — 2026

MUSE Creative Awards Silver Winner | Digital Product Design | PawPath — 2026
