

LISHA CHEN

Kenmore, WA | 202-436-6428 | morninglisha@gmail.com | lisagh.github.io

PROFESSIONAL SUMMARY

Software engineer with 7+ years of experience combining frontend architecture and product design. Specializes in accessible shared UI systems and interactive prototypes, with end-to-end delivery experience across consumer platforms and AI creation tools.

TECHNICAL SKILLS

Engineering: React, React Native, TypeScript, JavaScript, HTML, CSS/SCSS, Performance Optimization, Frontend Architecture, Percy, Playwright

Design & UX: Design Systems, Design Tokens, Shared UI Libraries, High-Fidelity Prototyping, WCAG Accessibility, Figma, Interaction Design, Data Visualization

EXPERIENCE

Warner Bros. Discovery (HBO Max) | Bellevue, WA

Software Engineer II, Frontend (Full-Time) | 11/2021 – Present | Promoted from SDE I in 2024

- Owned the technical design and implementation of key feature frameworks across three HBO Max rebuilds, using shared components and design tokens to standardize responsive, accessible behavior across product surfaces.
- Turned the Paris Olympics schedule from an event-specific page into a reusable feature supporting 1,700+ annual NBA, NHL, and MLB live events, owning the framework's technical design and implementation.
- Improved authentication reliability across regional payment systems by resolving API integration and data-handling issues.
- Streamlined team testing and review through automated CI failure summaries and AI-generated unit tests. Evaluated UI regressions with Percy and Playwright and supported critical live operations through active on-call monitoring.
- Mentored new engineers on frontend practices and conducted technical interviews for engineering interns.

eBay | Bellevue, WA

Software Engineer, Full-Stack (Contract) | 09/2019 – 06/2021

- Owned frontend architecture and full-stack implementation of a React-based campaign management platform from 0 to 1 as a founding developer in an eBay Marketing Tech division.
- Shaped the platform's end-to-end data flow, defining API contracts with backend engineers and middleware transformations to support campaign and conversion dashboards in partnership with UX designers.
- Extended frontend reuse beyond the original platform through shared UI components adopted across marketing engineering teams, accelerating cross-team delivery.

John Deere | Moline, IL

UX Designer & Prototyper (Contract) | 12/2018 – 07/2019

- Translated combine harvester hardware states and constraints into clear touchscreen workflows and user interactions.
- Improved engineering handoff efficiency by 50% through interactive UI documentation and clearer design specifications.

SELECTED PROJECTS

Zhenfy.ai | Design Lead & UX Engineer

- Drove end-to-end design and development of a no-code AI app-building platform, including brand identity and prompt-driven layout generation.
- Built interactive prototypes for role-adaptive workflows and error recovery, and created brand and loading animations with reduced-motion support.

PawPath | Engineering Lead

- Directed frontend implementation for PawPath, partnering with designers on accessible post-adoption care workflows for shelters and adopters.

EDUCATION

M.S., Human-Computer Interaction | Indiana University, School of Informatics, Indianapolis, IN | 2016–2018

B.B.A., E-Commerce | Xiamen University, Tan Kah Kee College, China | 2011–2015

AWARDS

Red Dot Award Winner (2026) | Brands & Communication Design | PawPath

MUSE Creative Awards Silver Winner (2026) | Digital Product Design | PawPath
